

HearthCAT™

People enjoy burning wood in their fireplaces. however, the wood smoke produced by residential fireplaces has been proven to be a deadly health hazard especially for children. (American Lung Association)

You can now protect the health of your family, your neighbors and your community with a new wood burning fireplace technology that eliminates most of the harmful pollutants from wood smoke.

The revolutionary HearthCAT™ Emission Control Technology is a patented catalytic system designed especially for wood burning fireplaces. It is easily installed directly above the fireplace grate and is invisible to the homeowner. It can be installed in less than an hour and doesn't require any maintenance. The HearthCAT™ captures and destroys up to 90% of the harmful smoke and pollutants before they can cause serious lung damage.

The HearthCAT™ System provides secondary ignition for the wood smoke before it leaves the firebox as harmful air pollution. The direct flame on the catalytic surface actually cleans the catalytic system. There is nothing else like the HearthCAT™ for reducing wood burning fireplace emissions.

Protect your family with the proven performance of the HearthCAT™ Emission Control Technology !

The HearthCAT™ Wood Burning Fireplace Retro-Fit System is installed exclusively by a nationwide network of trained chimney sweep technicians. Not available elsewhere!

HearthCAT™

Fireplace Technology

There are Many Good Reasons to Install a HearthCAT™ Emission Control System in your Wood Burning Fireplace.

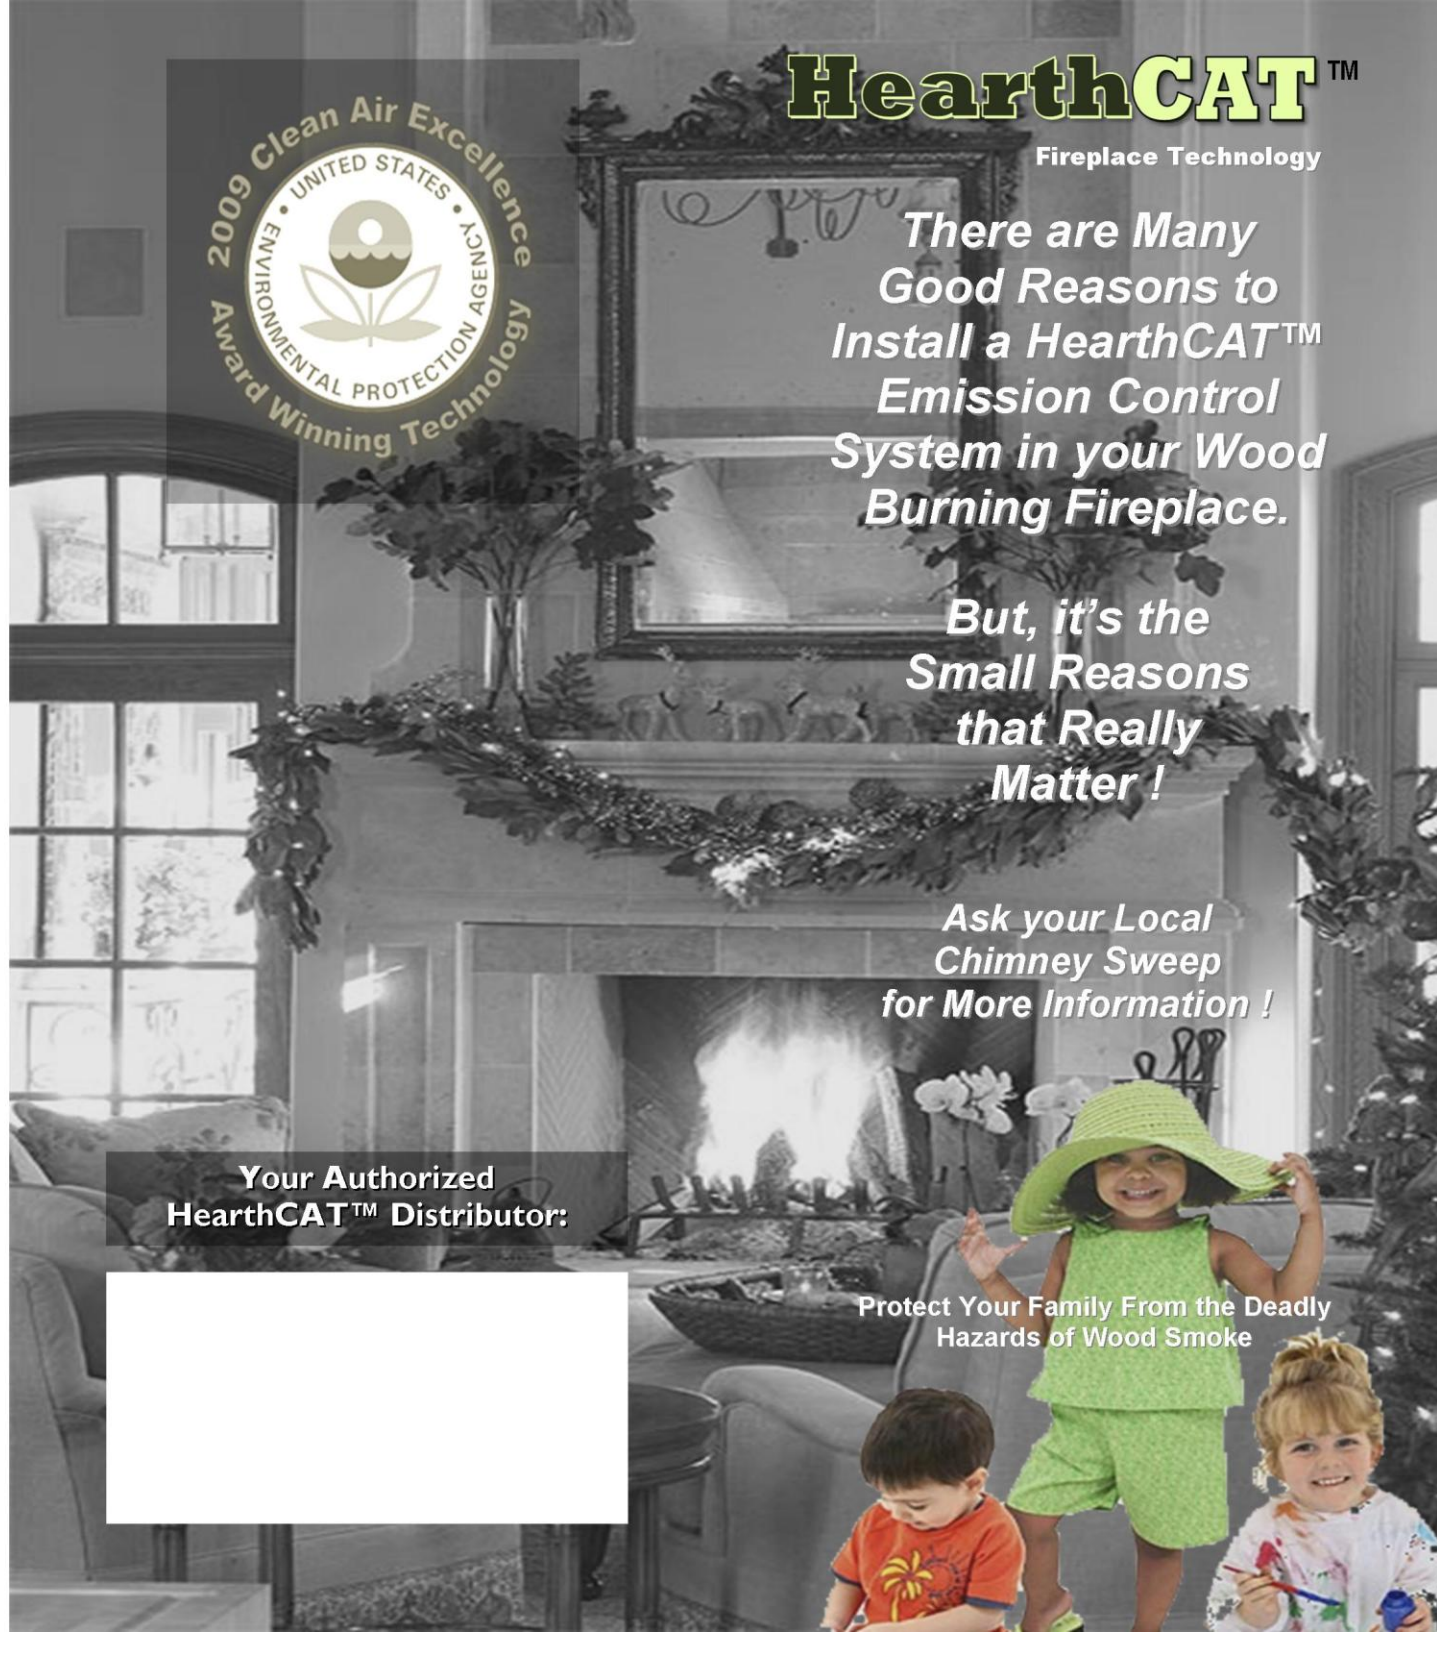

But, it's the Small Reasons that Really Matter !

Protect Your Family From the Deadly Hazards of Wood Smoke

At Clear Skies, we began working on a solution to the problem of wood burning fireplace pollution over 10 years ago.

We conducted an extensive research and development effort that involved years of emissions testing on every conceivable fireplace type, design and configuration.

Working closely with the US EPA, we developed a state-of-the-art catalytic fireplace technology.

Our New Technology

Our goal was to design, develop and test a totally passive emission control device for wood burning fireplaces that was easily installed, affordable to the consumer and acceptable to the US Environmental Protection Agency for wood burning fireplace retro-fit installations across the US.

We accomplished our goal and exceeded all expectations with the development of our revolutionary HearthCAT™ Emission Control System for Wood Burning Fireplaces. The HearthCAT™ reduces particulates, carbon monoxide and volatile organic compounds.

EPA Award Winning Technology

The HearthCAT™ Device was recently awarded the prestigious Clean Air Excellence Award for new Technology for 2009 by the US Environmental Protection Agency. The HearthCAT™ is projected to have a significant impact on air quality nationwide by substantially reducing emissions from wood burning fireplaces.

Extensive Testing and Qualification

The HearthCAT™ Emission Control System was tested extensively at Omni-Test Laboratories in Portland, OR. All emissions testing was performed to ASTM E-2558 for wood Fireplaces.

The ASTM E-2558 Wood Burning Fireplace Standard is recognized by the US EPA as the official test standard for wood burning fireplace emissions qualification testing.

The HearthCAT™ System consistently reduces particulates by an average of 80%.

See Omni Test Report # 165-F-05-03.

Wood Fireplace Retro-Fits In California

Most of the Air Districts in California will allow and even encourage the retro-fit of existing wood burning fireplaces with the HearthCAT™ Emission Control Retro-Fit System.

The HearthCAT can legally be installed in Sacramento Metro Air District, San Joaquin Valley, South Coast Air Quality Management District, Placer County, Kern County and many other Air Pollution Control Districts in California.

Check with you local Chimney Sweep to find out more about Air District Approvals and wood burning fireplace retro-fits in your area.

Contact Your Local Chimney Sweep

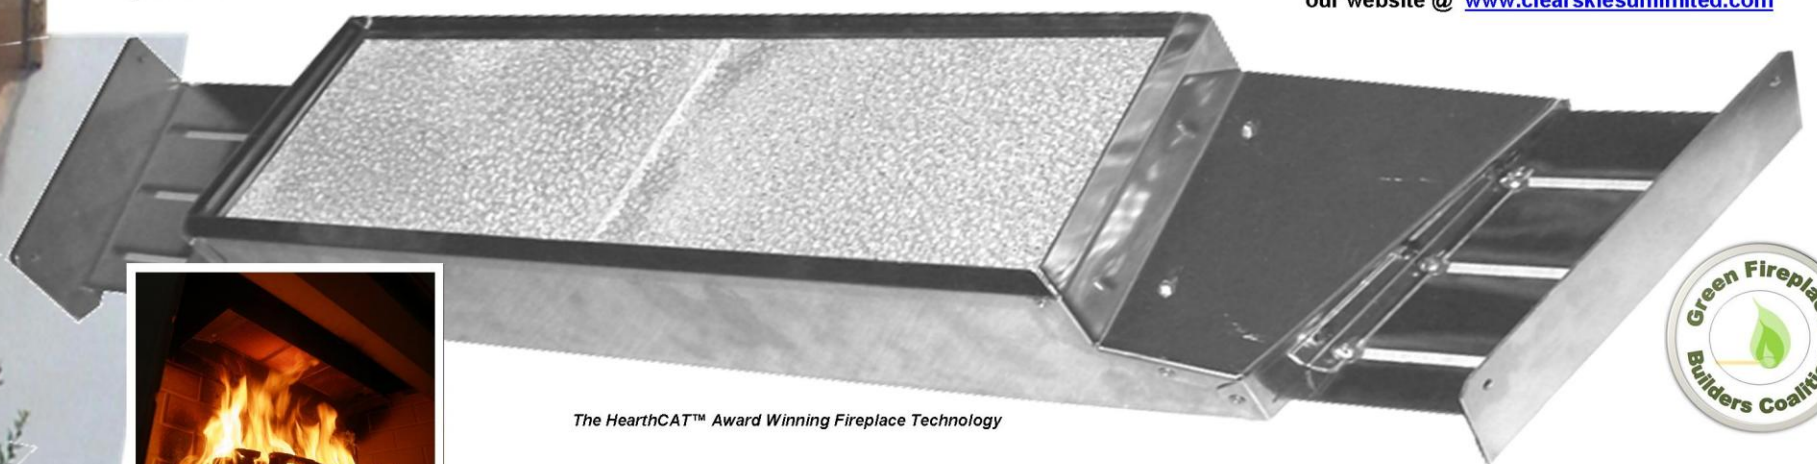

The HearthCAT™ Emission Control Retro-Fit System for Wood Burning Fireplaces can only be purchased from and installed by a certified chimney sweep technician.

This insures that your fireplace is properly inspected and cleaned prior to installation of the HearthCAT™.

Warranty and Replacement

Your HearthCAT™ is covered by a three year full replacement warranty if the unit should cease to function from normal operation within the warranty period.

US EPA recommends that the HearthCAT™ Catalytic element be replaced every five years to insure that the unit is providing continuous air quality benefits to your family, your neighbors and your community. Visit our website @ www.clearskiesunlimited.com
